

Adopt-A-Spot

The City of Milan would like to recognize and thank all of those who have in the past and are currently participating in the Adopt-A-Spot program and are volunteering to help clean up and maintain the appearance of our City. A couple notable recent examples are from our Milan C-2 School, Ms. Gray's High School Multicultural Club students, and Mrs. Yocom's Middle School Future Business Leaders of America (FBLA) program students. Their efforts and enthusiasm are truly commendable and should set an example for us all.

The Adopt-A-Spot initiative that these students and others participate in is a litter prevention and beautification program designed to help clean up and maintain the appearance of our community. A "Spot" can be your neighborhood, your schoolyard, a vacant lot, or any Spot that you are interested in keeping litter-free. Maintenance of your Spot requires a commitment from you. The benefits to you and others include the proud feeling of adopting a Spot, the beauty added to the area, the positive impact on our community, and recognition of your efforts. There are still many areas available and waiting for someone to "adopt" them as their Spot! For more information on the Adopt-A-Spot program, please contact the City Administrator at City Hall, 265-4420, or Alderman Randy McCollum at 265-4933.
